

Web Development Internship – Task 2

Task Description

In Task-1, you created a **single landing page** with a hero section and features. That was your first step into modern web design.

Now, you will build a **Personal Portfolio Website**. This is one of the most important beginner projects because almost every developer/designer has one.

Your portfolio will include sections like **About Me**, **Projects**, and **Contact**. You will also add **animations and transitions** to make it visually appealing. Finally, you will **host it online using GitHub Pages** so anyone can view it.

What You'll Build (Requirements)

1. Sections Required:

- **Hero Section** → Your name + tagline.
- **About Section** → A short description about you.
- **Projects Section** → Showcase at least 2–3 projects (real or sample).
- **Contact Section** → Email / form / links.

2. CSS Animations:

- Buttons should have hover effects.
- Text/images can fade in while scrolling.

3. Responsive Design:

- Use **media queries** to make it look good on mobile.

4. Deployment:

- Host the portfolio using **GitHub Pages** (free).

Why This Task Is Important

- Helps you build your **own online presence**.
- Teaches you about **CSS animations & transitions**.
- First time deploying a project **live on the internet**.

Deliverable

A hosted portfolio website with About, Projects, and Contact sections.

Sample Starter Code

Hero Section (HTML)

html

```
<section class="hero">
  <h1>Hello, I'm Alex 🙋‍♂️</h1>
  <p>Web Developer | Designer | Learner</p>
  <button>View My Work</button>
</section>
```

CSS Hover Animation

CSS

```
button {
  background: #007bff;
  color: white;
  padding: 10px 20px;
  border: none;
  transition: 0.3s ease;
}

button:hover {
  background: #0056b3;
  transform: scale(1.05);
}
```

Media Query Example (CSS)

CSS

```
@media (max-width: 768px) {
  .hero h1 {
    font-size: 24px;
  }
}
```
